PRACTICAL CLINICAL COURSES

PROCEDURE FOR RECEIVING
ACADEMY OF GENERAL DENTISTRY
AND STATE CREDIT
FOR DVDS

1. Complete the enclosed Post-Test.* For each **CE Video Purchased**, one test is included. If additional tests are needed, the following fees will apply: \$25 per test for 1 additional dentist; \$10 per test for each auxiliary (dental assistants, hygienists, lab technicians - no limit on auxiliary tests). Fees can be paid either by check or credit card when tests are submitted to Practical Clinical Courses.
2. Complete the demographic information located at the end of the test.
Type of Credit:
 - a. If the applicant selects "State," PCC will send a certificate of verification to the applicant. The applicant must then submit this certificate to his/her state board to obtain credit.
 - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry and confirmation to the applicant that it has been submitted. (The applicant may check their AGD transcript for verification – please allow 30 days.)
 - c. If the applicant selects "Both," PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

Practical Clinical Courses
3707 N Canyon Road
Suite 3D
Provo, UT 84604
Fax: (801) 226-8637
info@pccdental.com

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

****TO OBTAIN CE CREDIT ONLINE:*** Login or create an account on www.pccdental.com and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 5:00 p.m. MST to add it to your account.

The techniques and procedures on this videotape are intended to be suggestions only. Any licensed practitioner viewing this presentation must make his or her own professional decisions about specific treatment for patients. PCC is not responsible for any damages or other liabilities (including attorney's fees) resulting, or claimed to result in whole or in part, from actual or alleged problems arising out of the use of this presentation.

PROGRAM

V2305 Proven Simple and Successful Use of Mini Implants

CLINICIAN RESPONSIBLE:

Gordon J. Christensen, DDS, MSD, PhD
CEO, Practical Clinical Courses
CEO, CR Foundation
Practicing Prosthodontist, Provo, Utah

GOALS & OBJECTIVES

At the completion of this video presentation, viewers should be able to:

1. Describe the current state of small-diameter implants (SDIs).
2. List the indications for SDIs.
3. List the rules for obtaining clinical success with SDIs.
4. List three brands of SDIs.
5. Discuss the supplies and instruments necessary for placing SDIs.
6. Discuss when a flap is needed when placing an implant.
7. List the clinical steps for placing an SDI.
8. Discuss the type of local anesthesia normally used for placement of SDIs.
9. Explain length of time required for initial soft-tissue healing.
10. Discuss the contents of a surgical kit for SDIs.
11. Discuss the number of SDIs to be placed in an edentulous mandible.
12. Discuss the number of SDIs to be placed in an edentulous maxilla.
13. Discuss what clinical conditions usually require making a soft-tissue flap.
14. Discuss what type of sutures to use when making a flap.
15. Describe the technique for placing soft denture reline material into “wells” in a denture allowing initial implant healing without a rigid abutment.
16. Discuss immediate loading of implant and when this is acceptable.
17. Discuss when immediate loading is contraindicated.
18. Describe a final impression procedure.
19. Describe the need or lack of it for a healing period and the time to wait.
20. Describe the denture seating appointment.

OVERVIEW

V2305 Proven Simple and Successful Use of Mini Implants

This video is on one of the most needed techniques in a typical general dentist's practice, small-diameter implants (SDIs) for edentulous and partially edentulous patients. The following and other topics are included:

- The current state of small-diameter implants (SDIs)
- Indications for SDIs
- Rules for obtaining clinical success with SDIs
- Three brands of SDIs
- Supplies and instruments necessary for placing SDIs
- When a flap is needed when placing an implant
- Clinical steps for placing an SDI
- Type of local anesthetic normally used for placement of SDIs
- Length of time required for initial soft-tissue healing
- Contents of a surgical kit for SDIs
- Number of SDIs to be placed in an edentulous mandible
- Number of SDIs to be placed in an edentulous maxilla
- Clinical conditions usually requiring making a soft-tissue flap
- Type of sutures to use when closing a flap
- Technique for placing soft denture reline material into "wells" in a denture allowing initial implant healing without a rigid abutment
- Immediate loading of implant and when this is acceptable
- When immediate loading is contraindicated
- Final impression procedure
- Need or lack of it for a healing period and the time to wait
- Denture seating appointment
- Many other topics

POST-TEST

V2305 Proven Simple and Successful Use of Mini Implants

1. Small-diameter implants (SDIs) are _____ in diameter.
 - a. 1.0 to 2.0 mm
 - b. 1.8 to 2.9 mm
 - c. 2.0 to 2.2 mm
 - d. 2.0 to 2.5 mm

2. Standard-diameter implants are _____ in diameter.
 - a. 3.0 to 4.0 mm
 - b. 3.0 to 5.0 mm
 - c. 3.0 to 6.0 mm
 - d. 3.0 to ~7.0 mm

3. Surgical motor and surgical handpieces:
 - a. are not needed for SDIs.
 - b. are used only for difficult SDI cases.
 - c. should always be used for SDIs.
 - d. none of the above.

4. Making a soft-tissue flap:
 - a. is always indicated for SDIs.
 - b. is a difficult procedure.
 - c. is slow to heal.
 - d. is indicated some of the time for SDIs.

5. The typical number of SDIs for an edentulous mandible is _____ SDIs.
 - a. 2
 - b. 4
 - c. 6
 - d. 8

6. The typical number of SDIs for an edentulous maxilla is _____ SDIs.
 - a. 2
 - b. 4
 - c. 6
 - d. 8

7. Several SDIs placed in an edentulous mandible without a flap:
 - a. can usually be loaded immediately after placement.
 - b. require up to 4 months before loading.
 - c. can seldom be loaded immediately.
 - d. can always be loaded immediately.

POST-TEST (CONT'D)

V2305 Proven Simple and Successful Use of Mini Implants

- 8. Final impressions for edentulous mandibles having 4 implants:
 - a. should be made in alginate.
 - b. should be made in polyether.
 - c. should be made in vinyl polysiloxane.
 - d. should be made in either polyether or polysiloxane.

- 9. Suturing material was suggested to be:
 - a. polyester.
 - b. polyglycolic acid (PGA).
 - c. black silk.
 - d. polypropylene.

- 10. A suggested staff-made denture pressure spot detecting media is composed of:
 - a. 30% zinc oxide and 70% Crisco.
 - b. 40% zinc oxide and 60% Crisco.
 - c. 50% zinc oxide and 50% Crisco.
 - d. 60% zinc oxide and 40% Crisco.
