PRACTICAL CLINICAL COURSES

PROCEDURE FOR RECEIVING
CE CREDIT FOR VIDEO COURSES

1. Complete the enclosed Post-Test.* For each **CE Video Purchased**, one test is included. If additional tests are needed, the following fees will apply: \$25 per test for 1 additional dentist; \$10 per test for each auxiliary (dental assistants, hygienists, lab technicians - no limit on auxiliary tests). Fees can be paid either by check or credit card when tests are submitted to Practical Clinical Courses.
2. Complete the demographic information located at the end of the test.
Type of Credit:
 - a. If the applicant selects "State," PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
 - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry and confirmation to the applicant that it has been submitted (*the applicant may check their AGD transcript for verification – please allow 30 days*).
 - c. If the applicant selects "Both," PCC will complete a & b above.
3. Return the **Post-Test portion** via email, fax, or mail. Our contact information is as follows:

Practical Clinical Courses
3707 N Canyon Road
Suite 3D
Provo, UT 84604
Fax: (801) 226-8637
info@pccdental.com

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

***TO OBTAIN CE CREDIT ONLINE:** Login or create an account on www.pccdental.com and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 4:00 p.m. MST to add it to your account.

PROGRAM

S4351 Surgical Crown Lengthening Simplified

CLINICIAN RESPONSIBLE:

Gordon J. Christensen, DDS, MSD, PhD

Founder and CEO, Practical Clinical Courses

Senior Consultant & Previous CEO, CR Foundation

Practicing Prosthodontist, Provo, Utah

GOALS & OBJECTIVES

At the completion of this video presentation, viewers should be able to:

1. Define when crown lengthening is needed for esthetic reasons.
2. Define when crown lengthening is mandatory for salvaging a tooth.
3. Draw an anatomical picture of the gingival attachment apparatus to the tooth.
4. Describe biologic width and draw a picture of it.
5. Describe the connective tissue attachment to a tooth.
6. Describe the epithelial attachment.
7. Approximate typical sulcus depth and how it relates to restorative dentistry.
8. Describe gingivectomy.
9. Describe when gingivectomy is indicated.
10. Describe surgical crown lengthening with bone removal.
11. Discuss when to do surgical crown lengthening with bone removal.
12. Discuss the basic instruments for gingivectomy.
13. Discuss the basic instruments for crown lengthening with bone removal.
14. Compare cutting soft tissue with a scalpel, an electrosurgery unit, and a laser.
15. Discuss the negative challenges when the biologic width is not correct.
16. Discuss how long to wait after gingivectomy before doing restorative dentistry.
17. Discuss how long to wait after crown lengthening with bone removal before doing restorative dentistry.
18. Discuss anesthetic use for crown lengthening procedures.
19. List situations in your practice where crown lengthening would be helpful.
20. Implement crown lengthening into your practice.

OVERVIEW

S4351 Surgical Crown Lengthening Simplified

Although crown lengthening is a valuable procedure and accomplished usually by periodontists, it could be accomplished by more general dentists. Gingivectomy is a relatively simple surgical procedure. It heals rapidly and is highly useful for both esthetic and restorative procedures. Bone removal relative to crown lengthening is somewhat more complex but still well within the realm of general dentistry for those who are interested.

The following topics are included in this video:

- When crown lengthening is needed for esthetic reasons.
- When crown lengthening is mandatory for salvaging a tooth.
- The anatomical picture of the gingival attachment apparatus to the tooth.
- Biologic width.
- The connective tissue attachment to a tooth.
- The epithelial attachment.
- Typical sulcus depth and how it relates to restorative dentistry.
- Gingivectomy.
- When gingivectomy is indicated.
- Surgical crown lengthening with bone removal.
- When to do surgical crown lengthening with bone removal.
- The basic instruments for gingivectomy.
- The basic instruments for crown lengthening with bone removal.
- A comparison of cutting soft tissue with a scalpel, an electrosurgery, and a laser.
- The negative challenges when the biologic width is not correct.
- How long to wait after gingivectomy before doing restorative dentistry.
- How long to wait after crown lengthening with bone removal before doing restorative dentistry.
- Anesthetic use for crown lengthening procedures.
- Situations in your practice where crown lengthening would be helpful.
- How to implement crown lengthening into your practice.

POST-TEST

S4351 Surgical Crown Lengthening Simplified

1. Crown lengthening is indicated for:
 - a. Esthetics.
 - b. Facilitating tooth buildups.
 - c. Specific diseases that cause gingival growth.
 - d. All the above.

2. A ferrule effect of about _____ should be present on preps for broken-down teeth.
 - a. 1 mm
 - b. 2 mm
 - c. 3 mm
 - d. 4 mm

3. The biologic width includes:
 - a. Epithelial attachment and sulcus.
 - b. Sulcus and connective tissue.
 - c. Connective tissue and epithelial attachment.

4. A gingivectomy must leave at least _____ of sulcus.
 - a. 1 mm
 - b. 3 mm
 - c. 2 mm
 - d. 4 mm

5. A gingivectomy includes:
 - a. Soft tissue only.
 - b. Bone and soft tissue.
 - c. Bone only.

6. Perform bone removal if:
 - a. The sulcus is 5 mm deep.
 - b. The gingival line is uneven.
 - c. It is necessary to allow gingival removal and still have 1 mm of sulcus left.

7. You may do a gingivectomy and bone removal on the same arch to correct a specific need.
 - a. True
 - b. False

POST-TEST (CONT'D)

S4351 Surgical Crown Lengthening Simplified

- 8. An anesthetic block is required for crown lengthening.
 - a. True
 - b. False

- 9. Both a gingivectomy and crown lengthening with bone removal are within the scope of educated/trained general dentists.
 - a. True
 - b. False

- 10. Antibiotics should usually be prescribed for crown lengthening.
 - a. True
 - b. False
