PRACTICAL CLINICAL COURSES

**PROCEDURE FOR RECEIVING
CE CREDIT FOR VIDEO COURSES**

1. Complete the enclosed Post-Test.* For each **CE Video Purchased**, one complimentary test is included. Additional tests are \$35/person per test. Fees can be paid by check or with a credit card when submitting tests to Practical Clinical Courses. If more than 10 CE tests are required per video, please contact us at 800-223-6569.
2. Complete the demographic information located at the end of the test.
Type of Credit:
 - a. If the applicant selects “State,” PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
 - b. If the applicant selects “AGD,” PCC will submit credit information to the Academy of General Dentistry. *The applicant may check their AGD transcript for verification – please allow 30 days.*
 - c. If the applicant selects “Both,” PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

Practical Clinical Courses

3707 N Canyon Road

Suite 3D

Provo, UT 84604

Fax: (801) 226-8637

ce-tests@pccdental.com

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

****TO OBTAIN CE CREDIT ONLINE:*** Login or create an account on www.pccdental.com and select “My CE Tests” from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE.** Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. – 3:00 p.m. Mountain Time to add it to your account.

PROGRAM

S1352 When to Kill or Remove a Tooth?

CLINICIAN RESPONSIBLE:

Gordon J. Christensen, DDS, MSD, PhD

Founder and CEO, Practical Clinical Courses

Senior Consultant & Previous CEO, CR Foundation

Practicing Prosthodontist, Provo, Utah

GOALS & OBJECTIVES

At the completion of this video presentation, viewers should be able to:

1. List five main factors related to when to retain natural teeth.
2. List five types of education for patients that can help your practice.
3. Discuss the six factors involved in adequate informed consent.
4. Describe the life cycle of a tooth.
5. Draw a slot prep on a premolar.
6. List the steps for disinfection and desensitization of tooth preps.
7. Discuss the main reasons for pulp capping instead of doing endo.
8. List the steps in pulp capping.
9. Describe a filler.
10. List materials appropriate for fillers.
11. Describe the main reasons for a bonding agent.
12. Describe a build-up.
13. List the major material types for build-ups.
14. Describe the main reason for placing retentive pins.
15. Describe characteristics necessary for accomplishing endo on a tooth.
16. List five situations when a post and core should be considered.
17. Describe the most popular type of post.
18. Describe when to remove a tooth and place an implant.
19. Describe when to remove a tooth and place a 3-unit fixed partial denture.
20. Describe when to remove a tooth (teeth) and place a removable prosthesis.

OVERVIEW

S1352 When to Kill or Remove a Tooth?

In recent years, there has been a continuing emphasis on removing teeth and placing implants. Now, after over 35 years of observing implants, peri-implantitis is present in about 50% of them within about ten years. It is time to reconsider. There are many ways to reduce the removal of natural teeth. This video shows how to KEEP NATURAL TEETH. The following and other subjects are included:

- Five main factors related to when to retain natural teeth.
- Five types of education for patients that can help your practice.
- Six factors involved in adequate informed consent.
- The life cycle of a tooth.
- Slot preps on a premolar.
- Steps for disinfection and desensitization of tooth preps.
- The main reasons for pulp capping instead of doing endo.
- The steps in pulp capping.
- Fillers.
- Materials appropriate for fillers.
- The main reasons for a bonding agent.
- Build-ups.
- The major material types for build-ups.
- The main reason for placing retentive pins.
- Characteristics necessary for accomplishing endo on a tooth.
- Five situations when a post and core should be considered.
- The most popular type of post.
- When to remove a tooth and place an implant.
- When to remove a tooth and place a 3-unit fixed partial denture.
- When to remove a tooth (teeth) and place a removable prosthesis.

POST-TEST

S1352 When to Kill or Remove a Tooth?

1. Dentistry's main goal is to:
 - a. Restore teeth with caries.
 - b. Find new restorative products.
 - c. Replace teeth lost by periodontal disease.
 - d. Retain natural teeth.
2. Which of the following statements is false?
 - a. Informed consent should be accomplished for all treatment plans.
 - b. Financial availability for treatment is not a factor for most patients.
 - c. Desire to retain natural teeth is a factor in treatment planning for most patients.
 - d. Previous oral hygiene is a factor in treatment planning for most patients.
3. Reducing the degenerating standard life cycle of a tooth is primarily up to the patient.
 - a. True
 - b. False
4. Conservative tooth preparations are:
 - a. Difficult.
 - b. Relatively simple.
 - c. Not important.
 - d. None of the above.
5. The desensitization and disinfection of tooth preparations presented in this video is:
 - a. Chlorhexidine gluconate.
 - b. Glutaraldehyde and HEMA.
 - c. Benzalkonium chloride.
 - d. None of the above.
6. Pulp capping is:
 - a. Always successful.
 - b. Over 50% successful.
 - c. Not usually successful.
7. When pulp capping:
 - a. The tooth should not be bleeding.
 - b. The first step is to remove all the caries.
 - c. Aluminum chloride can be applied if mild bleeding is difficult to control.

POST-TEST (CONT'D)

S1352 When to Kill or Remove a Tooth?

8. Composite build-ups are:
 - a. Cariostatic.
 - b. Not cariostatic.
9. Glass ionomer can be used for some build-ups.
 - a. True
 - b. False
10. Patient compliance to your preventive suggestions is _____ for reversal or reduction of caries.
 - a. Mandatory
 - b. Voluntary
