# Gordon J. Christensen PRACTICAL CLINICAL COURSES

# PROCEDURE FOR RECEIVING CE CREDIT FOR VIDEO COURSES

- 1. Complete the enclosed Post-Test.\* For each <u>CE Video Purchased</u>, one complimentary test is included. Additional tests are \$35/person per test. Fees can be paid by check or with a credit card when submitting tests to Practical Clinical Courses. If more than 10 CE tests are required per video, please contact us at 800-223-6569.
- 2. Complete the demographic information located at the end of the test. **Type of Credit:** 
  - a. If the applicant selects "State," PCC will issue a certificate of verification to the applicant. The applicant must then submit this certificate to their state board to obtain credit.
  - b. If the applicant selects "AGD," PCC will submit credit information to the Academy of General Dentistry. The applicant may check their AGD transcript for verification please allow 30 days.
  - c. If the applicant selects "Both," PCC will complete a. & b. above.
- 3. Return the Post-Test portion via mail, fax, or email. Our contact information is as follows:

Practical Clinical Courses 3707 N Canyon Road Suite 3D Provo, UT 84604 Fax: (801) 226-8637

cetests@pccdental.com

- 4. Practical Clinical Courses will correct the Post-Test. Passing scores are 70% or higher.
  - \*TO OBTAIN CE CREDIT ONLINE: Login or create an account on www.pccdental.com and select "My CE Tests" from the left-side menu. Click on the video title to take the test online. **RESULTS ARE IMMEDIATE**. Missing the test? Contact us at 800-223-6569 during our business hours of 7:00 a.m. 3:00 p.m. Mountain Time to add it to your account.

# **PROGRAM**

# **V2551 Predictable Removable Partial Dentures**

## **CLINICIAN RESPONSIBLE:**

Gordon J. Christensen, DDS, MSD, PhD

Founder and CEO, Practical Clinical Courses Senior Consultant & Previous CEO, CR Foundation Practicing Prosthodontist, Provo, Utah

# **GOALS & OBJECTIVES**

On completion of this video, viewers should be able to:

- 1. Discuss the history of removable partial dentures (RPDs).
- 2. Describe why RPDs have been a challenge for both patients and dentists.
- 3. List alternatives for RPDs.
- 4. List the advantages of using implants with RPDs.
- 5. Describe the various implants that can be used with RPDs.
- 6. Discuss innovative treatment plans using implants with RPDs for Kennedy classes I, II, III, and IV.
- 7. Discuss types of implant abutment attachments to be used with RPDs.
- 8. Discuss use of RPDs as transitional treatment, leading on to fixed prosthodontics.
- 9. Discuss RPDs as final treatment.
- 10. List the sequence of treatment using implants under a new RPD.
- 11. Describe the diagnostic appointment for RPDs.
- 12. List the steps in making a final impression for an RPD.
- 13. Describe how the final impression can be made in such a way that the RPD does not rock.
- 14. Discuss the need for occlusal rests and tooth contouring when using RPDs.
- 15. Describe the desirable characteristics for metal frameworks.
- 16. List the steps when determining the centric jaw relation.
- 17. List important factors during the tooth try-in.
- 18. List the steps when seating the RPD.
- 19. Discuss occlusal considerations for RPDs.
- 20. Describe the steps in postoperative adjustments.

# **OVERVIEW**

#### V2551 Predictable Removable Partial Dentures

Removable partial dentures have always been a significant negative procedure for both patients and dentists. Why they are a problem is quite identifiable. They have clasps that can be uncomfortable and unesthetic. They often loosen and sensitize natural teeth to which they are connected. They become loose over a relatively short period of service, and when tightened, they feel good for only a short time. All dentists have broken partial denture clasps when attempting to tighten them. Some patients lose their partials. Dogs eat them if they are left out of the mouth and in an accessible location. Yes, occasionally any of us can make a partial that is really liked by the patient. Unfortunately, the frequency of such success is limited.

The content of this video can reduce or eliminate most of the problems described above. The following and other subjects are included in this presentation:

- The frustrating history of removable partial dentures (RPDs)
- Alternatives for RPDs
- Advantages of using implants with RPDs
- Types of implants for use with RPDs
- Innovative treatment plans using implants with RPDs
- Implants and Kennedy Class Is
- Implants and Kennedy Class IIs
- Implants and Kennedy Class IIIs
- Implants and Kennedy Class IVs
- Types of attachments
- RPDs as transitional treatment
- RPDs as final treatment
- Sequence of treatment for new RPDs using implants
- Diagnostic appointment
- Implant placement
- Appearance of patient 8 years after completion of treatment
- Provisional restoration after implant placement and before denture completion
- Modification of teeth and occlusal rests
- Final impressions
- Framework try-in
- Centric jaw relation
- Tooth try-in
- Seating RPD
- Occlusal considerations
- Adjustment appointment
- Placing implants under a previously functional RPD
- Conclusions about implant-supported and retained RPDs

# **POST-TEST**

#### V2551 Predictable Removable Partial Dentures

- 1. Conventional removable partial dentures have been objectionable because of:
  - a. unsightly clasps.
  - b. inadequate retention.
  - c. inadequate support and a "rocking motion" toward the edentulous areas.
  - d. all of the above.
- 2. Using the average diameter of implants as a guide for denture support and retention:
  - a. one small-diameter implant equals one conventional-diameter implant.
  - b. two small-diameter implants equal one conventional-diameter implant.
  - c. three small-diameter implants equal one conventional-diameter implant.
  - d. four small-diameter implants equal one conventional-diameter implant.
- 3. One of the most adequate places for implants used as support and retention for removable partial dentures

is:

- a. the maxillary tuberosity area.
- b. the triangle of bone just over the mental foramen.
- c. the triangle of bone distal or mesial to remaining natural teeth.
- d. none of the above.
- 4. Usually, the most inadequate conventional removable partial denture is:
  - a. Kennedy Class I.
  - b. Kennedy Class II.
  - c. Kennedy Class III.
  - d. Kennedy Class IV.
- 5. The most flexible and resilient attachment for connecting implants to the denture is:
  - a. an ERA.
  - b. a Locator.
  - c. a sphere abutment to retain the denture using a rubber washer in a housing in the denture.
  - d. a Hader bar.
- 6. The cast from which a custom tray is made is fabricated from an alginate impression:
  - a. on the first appointment after the diagnostic appointment.
  - b. during the final impression appointment.
  - c. at the centric jaw relation appointment.
  - d. at the diagnostic appointment.
- 7. The most stable type of occlusion rim (bite block) for large soft-tissue edentulous areas is made from:
  - a. shellac.
  - b. PMMA.
  - c. VPS lined light-curing tray material.
  - d. wax alone.

# POST-TEST (CONT'D)

## V2551 Predictable Removable Partial Dentures

- 8. Metal frameworks for removable partial dentures should be:
  - a. relieved from the cast to avoid sore spots.
  - b. thin, flexible, and cast directly to the stone model without relief.
  - c. always made from nickel-chrome metal.
  - d. thick and strong to avoid fracture of the metal.
- 9. Saying any word with "s" in it with the occlusion rims in place helps to locate:
  - a. correct vertical dimension of occlusion.
  - b. freeway space.
  - c. curve of Spee.
  - d. curve of Wilson.
- 10. Custom trays for final impressions should be:
  - a. relieved from the stone model to allow for a thickness of impression material.
  - b. fitted tightly to the remaining natural teeth.
  - c. relieved only from the teeth receiving clasps.
  - d. made to tightly fit the edentulous ridge.
