AGD Post-Test

**Gordon J. Christensen**  
**PRACTICAL CLINICAL COURSES**

**PROCEDURE FOR RECEIVING**  
**ACADEMY OF GENERAL DENTISTRY**  
**AND STATE CREDIT**  
**FOR CE VIDEOS**

1. Complete the enclosed Post-Test. For each **CE Video Purchased**, one test is included. If additional tests are needed, the following fees will apply: \$25 per test per dentist (limit 1 additional dentist per video purchased); \$10 per test per auxiliary (dental assistants, hygienists, lab technicians - no limit on auxiliary tests). Fees can be paid either by check or credit card when tests are submitted to Practical Clinical Courses.
2. Complete the demographic information located at the end of the test.  
**Type of Credit:**
  - a. If the applicant selects "AGD," PCC will send notification to both the applicant and the Academy of General Dentistry. (The AGD will also notify applicant of credits earned by printout information.)
  - b. If the applicant selects "State," PCC will send a certificate of verification to the applicant. The applicant must then submit this certificate to his/her state board to obtain credit.
  - c. If the applicant selects "Both," PCC will complete a. & b. above.
3. Return the **Post-Test portion** via mail, fax, or email. Our contact information is as follows:

**Practical Clinical Courses**  
**3707 N Canyon Road**  
**Suite 3D**  
**Provo, UT 84604**  
**Fax: (801) 226-8637**  
[info@pccdental.com](mailto:info@pccdental.com)

4. Practical Clinical Courses will correct the Post-Test. **Passing scores are 70% or higher.**

**Gordon J. Christensen Practical Clinical Courses, 3707 North Canyon Road, Suite 3D, Provo, UT 84604**

**Toll Free (800) 223-6569 or Utah Residents (801) 226-6569**

The techniques and procedures on this videotape are intended to be suggestions only. Any licensed practitioner viewing this presentation must make his or her own professional decisions about specific treatment for patients. PCC is not responsible for any damages or other liabilities (including attorney's fees) resulting, or claimed to result in whole or in part, from actual or alleged problems arising out of the use of this presentation.

## PROGRAM

### **V4181 Atraumatic Removal of Teeth - Erupted and Impacted**

#### CLINICIANS RESPONSIBLE:

**Karl R. Koerner, DDS, MS**  
General Practitioner, Logan, Utah

**Gordon J. Christensen, DDS, MSD, PhD**  
CEO, Practical Clinical Courses  
CEO, CR Foundation  
Practicing Prosthodontist, Provo, Utah

#### GOALS & OBJECTIVES

At the completion of this video presentation, viewers should be able to:

1. Describe the importance of competence in oral surgery for general dental practitioners.
2. List and describe the typical historical oral surgery instruments.
3. List and describe typical new generation oral surgery instruments.
4. Discuss surgical concepts related to oral surgery.
5. Discuss handpieces commonly used in oral surgery.
6. Describe the typical technique for removal of erupted teeth with supragingival tooth structure present.
7. Discuss the typical technique for removal of erupted teeth broken off at the gingiva or bone.
8. Discuss sutures most suitable for oral surgery.
9. Describe a typical technique for removal of impacted teeth.
10. Discuss use of narcotics for oral surgery procedures.
11. Discuss use of antibiotics for oral surgery procedures.
12. Describe commonly occurring surgical complications.
13. Describe a "luxator".
14. Describe the action of removal of a mandibular first molar with a "cowhorn" forcep.
15. Describe the relative level of force needed to remove a tooth.
16. Describe how to place elevator force on a tooth to be extracted without placing force on adjacent teeth.
17. Discuss how to achieve compression of bone during tooth extraction.
18. Discuss the reasons for sectioning teeth for tooth removal.
19. Discuss use of periostomes.
20. Discuss air emphysema.

## OVERVIEW

### **V4181 Atraumatic Removal of Teeth - Erupted and Impacted**

Tooth extraction is a commonly required procedure for almost all general dentists. Education and training, as well as significant experience, are required to achieve competency in tooth removal. This video describes and demonstrates the principles for removal of erupted and impacted teeth, techniques, and potential complications. The following topics are included:

- Importance of competence in surgical procedures.
- Conventional oral surgery instruments.
- Newer oral surgery instruments.
- Surgical concepts.
- Surgical handpieces.
- Use of surgical handpieces.
- Removal of erupted teeth with supragingival tooth structure present.
- Sutures and suturing.
- Removal of erupted teeth broken off at the gingiva or bone.
- Removal of multiple teeth.
- Removal of impacted teeth.
- Analgesic use.
- Antibiotic use.
- Commonly occurring surgical complications.
- Postoperative care.
- Clinical demonstrations of tooth removal on patients are included for each procedure.

## POST-TEST

### **V4181 Atraumatic Removal of Teeth - Erupted and Impacted**

1. Why should general dentists have competency in tooth removal?
  - a. To have peace of mind when faced with the necessity for tooth removal.
  - b. To provide one-stop service for their patients.
  - c. To be able to manage potential surgical complications.
  - d. All of the above.
  
2. Air emphysema is caused by:
  - a. excessive vigorous breathing causing bloating of the lungs and fainting.
  - b. blowing air from a handpiece into the soft tissues.
  - c. treating a patient with emphysema from smoking.
  - d. none of the above.
  
3. Most oral surgeons use a \_\_\_\_\_ handpiece for bone removal when removing impacted teeth.
  - a. surgical high-speed air rotor
  - b. restorative air rotor
  - c. surgical straight handpiece
  - d. restorative electric handpiece
  
4. The following are newer instruments for oral surgery procedures:
  - a. periotome burs.
  - b. double-ended periotomes.
  - c. luxating elevators.
  - d. Physics Forceps.
  - e. all of the above.
  
5. The type of suture material recommended in this presentation is:
  - a. polyester.
  - b. PGA.
  - c. black silk.
  - d. Chromic Gut.
  
6. The following are conventional instruments long used in oral surgery procedures:
  - a. Rongeurs.
  - b. Universal Forceps.
  - c. Bone Files.
  - d. all of the above.

**POST-TEST (CONT'D)**

**V4181 Atraumatic Removal of Teeth - Erupted and Impacted**

7. When removing a tooth with a "luxator", force should be applied in an apical direction on the \_\_\_\_\_ side(s) of the tooth.
  - a. facial and lingual
  - b. distal only
  - c. mesial only
  - d. mesial and distal
  
8. When using a "luxator", the instrument should be inserted into the periodontal ligament about \_\_\_\_\_.
  - a. 1 mm
  - b. 2 mm
  - c. 3 mm
  - d. 4 mm
  
9. When removing impacted third molars:
  - a. making a surgical flap is always recommended.
  - b. removal of bone for access to the tooth is always recommended.
  - c. making a surgical flap and removing some bone for instrument access is often necessary.
  - d. suturing the extraction site is usually necessary.
  
10. What protocol is recommended when removing impactions?
  - a. Narcotics are necessary due to severe postoperative pain.
  - b. Antibiotic delivery is usually necessary.
  - c. Use of antibiotics and narcotics may be necessary.
  - d. Always deliver only non-prescription analgesics.
